Claims 1, 10, and 16 teach a method and apparatus and means for a disk drive. Regarding claims 1 and 16, the distinguishing elements of the claims teach a first region is radially outward from a second region if the hard disk drive employs perpendicular recording and otherwise if the hard disk drive employs longitudinal recording the first region is radially inward from the second region. Regarding claim 10, the distinguishing elements of the claim teach a mid-zone of at least one band of data between the inner and outer zones and a control means executing random access writes to the mid-zone.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
